

Khushboo Kumari

 khushboomauriya830@gmail.com  6207269051  Patna

Career Objective

AI & Data Science trainee with strong foundation in Python, SQL (MySQL), Power BI, Machine Learning, Deep Learning, NLP, and Computer Vision. Experienced in building real-world projects such as predictive models, dashboards, sentiment analysis, and database management systems. Seeking an entry-level role in AI/ML, Data Analytics, or Data Science to apply technical and analytical skills in solving business problems.

Education

BA , Banaras Hindu University	2021
69%	Banaras
12th , Janta College, SinghiaBuzurg, Samastipur	2017
60 .5%	Singhia Buzurg, Samastipur
10th , S D S K Girl's H S Singhia Ghat	2015
69%	Singhia Ghat

Internship / Training

Artificial Intelligence Programming Assistant - By DGT, Microsoft and Edunet Foundation - NSTI W Patna 2025 - 2026	2025 - 2026
---	-------------

Responsibilities / Learning:

- Learned to analyze, visualize, and derive business insights from data using Python, SQL, and BI tools.
- Gained strong foundations in computer systems, operating systems, Python programming, and database management.
- Built practical skills in AI, machine learning, deep learning, NLP, and computer vision for real world applications.
- Developed end to end AI solutions using Generative AI, GitHub collaboration, and Streamlit deployment.

Skills

Projects / Practical Work

Predictive Analysis of EV Charging Demand (June, 2026)

- Developed a machine learning model using Python to predict electric vehicle charging demand based on historical data. Performed data analysis and visualization to identify usage patterns, helping improve charging station planning and reduce waiting times.

Customer Support Ticket Classifier (May , 2026)

- Built an NLP-based system that automatically classifies customer support tickets into categories like billing, technical, and complaints. Also implemented urgency detection to help prioritize critical issues

Speech Emotion Recognition (April , 2026)

- Designed a deep learning model (RNN/CNN) to analyze speech signals and detect human emotions such as happy, sad, or angry. Used audio data preprocessing and model training to improve emotion classification accuracy

Parkinson’s Disease Prediction System (March , 2026)

- Developed a machine learning model to predict Parkinson’s disease using patient health data. Conducted exploratory data analysis and visualization to identify important features and improve prediction performance.

Sales Performance Dashboard (February, 2026)

- Developed an interactive sales analytics dashboard in Power BI to monitor revenue, orders, regional performance, and monthly trends using DAX-based KPIs and dynamic visualizations.

Bank Loan Approval Analysis (February, 2026)

- Created an interactive loan analytics dashboard using Python and Streamlit, featuring approval rate analysis, applicant insights, and a rule-based loan eligibility prediction system.
